

## English Beading Needles

These stiff, yet flexible, English beading needles are referred to by beaders as “longs”. John James English needles are high quality and one of our most popular beading needle options. Standard beading needles are very fine and long. The eye of the needle is the same width as the rest of the needle. Made in England. Sold by the box of one dozen retail-ready blister packages (4 per pack).

## Pebble English Beading Needle Sets

Pebbles are a great way to store beading needles safely, making them easily visible & accessible in a bead box, craft bag, drawer, or purse. Each set comes in an elegant & distinctively colored storage case for quick identification. Choose from four #10 needles in a lavender case; four #12 needles in a dusty pink case; or an assortment of two #10 & two #12 in a turquoise case. Assembled in China using finest quality English needles. Sold by the box of six retail-ready packages (4 per pack).

### Choosing the Correct Beading Needle:

Smaller beads such as seed beads require a slender beading needle with a narrow eye (#10 - 15 work best). Sizes 10-12 work great for most standard seed bead projects, while size 15 works great for tiny seed beads such as 15/0.

#10/12 English Beading Needles are very fine needles for stringing beads and sewing beads onto fabric!
